

STORE MANAGEMENT

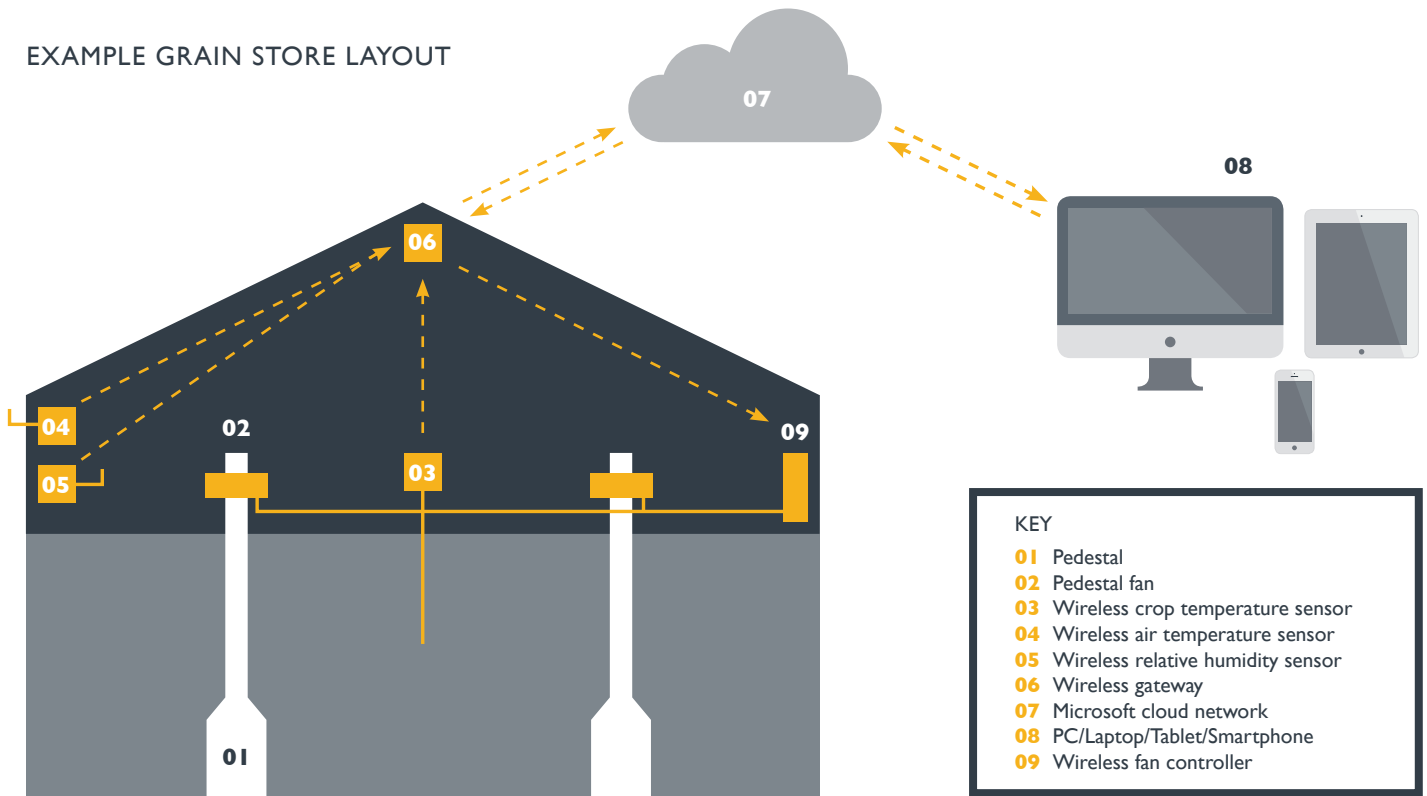

Store Management

Wireless and remote monitoring deliver peace of mind. Wherever you are you know what is happening in your grain store.

STORE MANAGEMENT

EXAMPLE GRAIN STORE LAYOUT

Measure:

- Crop temperature across the grain store
- Ambient air temperature and relative humidity

Monitor:

- See exactly what is happening in the grain store anywhere via the webpage
- Secure transmission and storage gives detailed record of storage conditions

Manage:

- Manually control individual cooling fan operation from the webpage
- Use pre-defined programs to automatically control fan operation based on measured data

BENEFITS

- 1 Safer crop storage** - Reach cooling targets quicker compared to manual control
- 2 Lower cooling costs** – Only ventilating in the right conditions can reduce costs by 40% compared to manual control
- 3 Accurate records** – Keep detailed storage records without manual sampling
